Schindler Ahead MediaScreen Lobby
Communicate throughout the journey

Schindler Ahead MediaScreen Lobby expands the possibilities of building communication, with a media solution covering the entire passenger journey – both inside and outside the elevator – for a seamless, uninterrupted experience. Entertain and inform your passengers when they are at their most receptive. Continue the conversation along the ride for a seamless passenger experience.

An unbeatable combination
MediaScreen Lobby allows you to grab attention at the right time and in the right place. In the elevator lobby, tenants, guests and visitors are likely to wait, providing the perfect opportunity for engagement. By combining MediaScreen Lobby with screens inside the elevators, your content has greater impact.

Benefits
Attractive and efficient display: Eliminate manual paper processes with a digital screen. Your messages are always relevant and are updated remotely – no need to be on-site.
Engaging experience: Turn wait times into an opportunity to inform, engage, and entertain your passenger.
One-stop solution. We provide the whole solution, from hardware to content management.

Schindler Ahead MediaScreen Lobby
Communicate throughout the journey

It's a match!
Combine MediaScreen Lobby with MediaScreen (in-car) for an extra wow factor. Synchronise content across multiple displays to provide your tenants a truly seamless journey.

Multimedia content at its best
From lunch menus and building events to maintenance and weather updates, MediaScreen Lobby can do it all! Mix important building information with more recreational content to engage your audience in the format you prefer such as images or videos. Your content, your way.

Optimal size
The MediaScreen is available in a 32" display – the ideal size for the lobby. This sleek design provides a modern feeling in the building for a long-lasting impression.

Content management
Uploading content to the Schindler Ahead Media has never been easier. Our web-based Schindler Ahead Content Management System (CMS) is user-friendly and allows content to be updated both remotely and in real time. Define content playlists for each individual screen and schedule publication around specific times or events for maximum impact. Perfectly timed messages, always.
