Schindler 3000
Stylish and functional
With distinctive designs and swiss-engineered components, the Schindler 3000 is a perfect – and practical – solution for residential buildings, hotels and small commercial projects. Take advantage of leading energy-efficient technologies and digital services, all in an economical package. Give your passengers a smooth, safe, and comfortable ride.
The Schindler 3000 offers a variety of design and dimensional combinations from a single product line, and can be tailored to suit any urban environment. Select from a full spectrum of styles, colours and options to find the best possible solution for your building.

The Schindler 3000 is part of the new modular platform product range. From basic to sophisticated requirements, the Schindler 3000 is suitable for low- to mid-rise applications in offices, residential apartments, hotels and educational buildings.

### Designed for comfort
Engineered to Swiss standards for 24/7 operation and smooth ride comfort.

### Architectural flexibility
The widest range of applications, plus maximum flexibility in car and shaft dimensions.

### Future ready
Elevators designed to interface with next-generation technologies.

### Multiple design options
Three design lines to complement your building interior.
Schindler 3000 is designed, engineered and rigorously tested to ensure smooth, quiet and economical operation throughout your elevator’s long life cycle, for every application, and in any environment.

**Latest technologies, greater comfort**
Variable frequency drive systems deliver perfectly controlled power to traction machines and door drives, extending component lifetimes and increasing energy efficiency. Schindler Suspension Traction Media is light and long-lasting, enabling the use of smaller traction machines that reduce both energy consumption and noise and vibration levels in the car.

**State-of-the-art digital controller**
Schindler’s scalable (universal) elevator controller offers more flexibility in number of openings, number of stops, and car group size. What’s more, Schindler’s innovative EPIC sensor data transfer system for the controller improves both reliability and maintainability for all Schindler controllers.

**High-quality – at every level**
Contact-free sensors assure millimeter-precise leveling with the floor for safe, seamless movement of passengers and goods in and out of the elevator.

**Innovative drive technology**
Schindler 3000 is equipped as standard with our innovative, regenerative drive technology. The system is designed to reduce travel energy by up to 30% compared to any conventional technology available.

**Excellent ecological performance**
Improving energy efficiency is essential to reduce the environmental impact of elevators and the buildings they serve. Eco-friendly features, such as regenerative drive, LED lighting and stand-by mode while parked, are standard in all Schindler 3000 elevators, achieving the highest energy-efficiency rating class A according to ISO 25745-2.*

---

*The classification always refers to a specific customer configuration. Usage pattern, load capacity, customer specific options and site conditions influence the final rating.

---

**Elevator segments**
**Tailored to Schindler 3000**

**We Elevate...**
**Offices**
Our elevators and escalators deliver passengers to their offices safely, quietly, efficiently and in comfort. Offering flexibility in design, car sizes and control options, our elevators and escalators run at maximum efficiency during peak traffic and reduce energy consumption off-peak.

**We Elevate...**
**Hotels**
With many years of experience supplying elevators and escalators to hotels worldwide, we deliver guests to their rooms quietly, efficiently and comfortably. Using the latest technology, we bring a new aesthetic design, enhanced security, in-car entertainment and exceptional performance that’s matched to guests’ needs and hotel requirements.

**We Elevate...**
**Residential**
Developers and owners of residential properties can always count on Schindler for stylish in-building transport that is safe, durable, smooth to ride, and highly efficient. With lighting, fixtures and colours to match the building’s architecture, we assure premium mobility for owners, facility managers and residents alike.

---

Elevator Segments | Schindler 3000
The Schindler 3000 benefits from our machine room-less (MRL) traction systems and compact door drives to optimise shaft space, reducing construction costs and leaving space for tenants.

Machine-room-less design
All main drive, traction and control equipment sits in the shaft, leaving architects and designers free to use the extra space for more productive purposes. The Schindler 3000 allows a larger car to be fitted into a standard shaft space.

Reduced headroom option

Built-in inspection and test panel

Modular system and door dimensions
The Schindler 3000 car width is available from 1100 mm to 1600 mm, car depth from 1400 mm to 2100 mm, and car height up to 2500 mm.

Doors can be sized and positioned with millimeter accuracy. The door width is adjustable in 100 mm increments for 2000 mm and 2100 mm door heights, with a choice of telescopic (T2) or centre-opening doors (C2), single or through entry car.

More usable building space
Less space for components, more usable building space and more room for passengers. Schindler 3000’s innovative platform ensures that a standard-sized shaft can carry a wider car with bigger load capacity.

Built-in inspection and test panel
Schindler 3000’s inspection and test panel is built directly into a standard door frame at the top landing. This solution simplifies elevator installation, provides easy access, and saves space.
Future ready
Schindler elevators designed for next-generation technologies

Benefit from our tools, solutions and latest innovations to support you through the entire product life cycle of your elevator. Our elevators are designed to use state-of-the-art technologies from planning to operation.

Plan & Design online
With just a few clicks, you can plan just the right elevator for your building. Our online Plan & Design tool provides you with recommendations, comprehensive product specifications and detailed layout drawings. All of these are compatible with Building Information Modeling standards, and with our Project Cloud you can share your projects with us.

Innovation in installation
Schindler’s new INEX (Installation Excellence) system not only reduces construction preparation and resources for our customers, it also improves safety and efficiency on site.

Smart operation – switching to digital
All our new elevators are fully enabled for Schindler Ahead – our IoT (Internet of Things) portfolio of services. With Schindler Ahead, we make sure that our customers can step confidently into the digital era.

- Maximise uptime with Ahead Remote Monitoring
With digital connectivity, issues can be detected and addressed well before service is affected. This helps facilities take timely action to minimise or even avoid downtime. Schindler Ahead maximises uptime thanks to instant, accurate insights.

- Real-time insights with Ahead ActionBoard
Schindler Ahead ActionBoard provides operational, performance and commercial information in real time, giving customers clear, instant oversight of their entire elevator and escalator portfolio.

User experience on a next level
Schindler Ahead MediaScreen makes paper a communication tool of the past. This in-car media solution provides relevant information to the passengers in real-time. Share building updates, news, weather, ensuring that passengers always stay informed.

Business tools, solutions and latest innovations to support you through the entire product life cycle of your elevator. Our elevators are designed to use state-of-the-art technologies from planning to operation.

Handrails
A choice of shapes and finishes

Schindler stainless steel handrails are designed to blend with car interiors, shapes and textures, and can be mounted to the side and rear walls.

Available in straight ends.

Skirting
Protect your walls

Our protruding and flush skirting range provides protection for the lift car interiors. Our practical range of skirting seamlessly blend with our range of interiors.

Customise your handrails

The handrails can be mounted in different combinations of side and rear walls, either only one handrail piece on the rear or side walls, two handrail pieces on the side walls or handrails on three walls.
Schindler Moving Package
Moving can be hassle-free

In residential and commercial buildings, moving is a part of daily life. Whether transporting household appliances, bookcases or beds, your elevators will be heavily used. Preserve the value of your property and elevator and avoid costly repairs. Our Moving Package can protect your elevator and avoid damages caused by relocations.

Your benefits at a glance

- The lift car interior wall panels are protected from scratches and other damage
- The independent service gives you priority and makes the move easier and safer
- The protective mats are made of sturdy materials and can be used many times

The package includes:

Wall protection mats
- Impact-absorbing, padded protective mats for the lift car walls, made from flame-retardant materials.
- Transparent film covers that will protect the operating panel.
- Supplied in a practical and robust bag.

Independent service
- Reserve the cabin via a key switch so you can remain on the desired floor with the doors open.
- Experience more efficient loading and unloading, that protects the elevator for a relaxed and fast move.

Independent service indication
- Communicates essential moving information to other passengers.
- Displays notification signage on the landing indicator panels that the lift is temporarily unavailable.

Other available option packages
- Security
- Penthouse

Schindler Security Package
Enhance your building security

The Schindler Security Package enhances security and safety within a building. From controlling unauthorised visitors from entering areas in a building to restricting access to selected floors. Our Security Package is not only an investment in asset protection, it’s also an investment in tenant safety and peace of mind.

Your benefits at a glance

- Control unauthorised visitors from entering protected areas in a building and enhance passenger safety and peace of mind
- Improve people flow and security

The package includes:

Card reader interface
- Enables passengers with floor access management rights and increased security by offering pre-installed wiring for your card reader hardware.

Automatic return to main floor
- A function where a car automatically parks at the main floor, reducing waiting times for passengers travelling from the ground floor, making their way to their destination faster and more comfortably.

Anti-nuisance
- When the lift stops in response to a car call, if no passengers enter or leave the lift it is potentially a malicious call. If this happens twice in a row, all existing car calls are cancelled. This is designed to reduce the number of erroneously or maliciously registered car calls.

Other available option packages
- Moving
- Penthouse
Schindler Plan & Design tool
Design your elevator layout in minutes

Our easy-to-use online planning tool makes it simple to find the matching vertical transportation setup for your building. The Schindler Plan & Design tool helps you to prepare specifications in the early stages of your building’s project life cycle.

With just a few clicks, we provide you with recommendations, a comprehensive product specification, and detailed layout drawings. Simply download the data straight into your project design in DWG or PDF formats.

The solution can be integrated with Building Information Modeling standards, and our Project Cloud makes it easy for you to share your projects with us.
