We Elevate

Schindler

We  
Elevate

# 2 billion

people every day

## About Schindler

Our elevators, escalators, and moving walks transport more than 2 billion people up and down buildings and across transit hubs every day. With our customers, we help organize cities: moving people and goods and connecting transportation systems.

## Global presence

Approximately 70,000 employees in over 100 countries serve our customers from over 1,000 branch offices worldwide, run production sites in eight countries, and operate six R&D facilities around the world.

## Responsibility

We recognise that the challenges of depleting resources, climate change, and a growing world population require innovative solutions. That is why we focus on reducing the energy required by our products, services, and operations; and making safety, accessibility, and respect for all a top priority.

## Customer excellence

We're dedicated to customer satisfaction and product excellence, with a focus on delivering exceptional service throughout the life span of your equipment. This commitment helps us build lasting, trust-based relationships with our clients.

Revolutionizing the  
way we move  
since 1874

1874

Founded by Robert Schindler and Eduard Villiger in Lucerne, Switzerland

1892

Built first electric elevator with belt drive

1906

Established first international venture in Germany

1936

Installed the first escalator

1974

Expanded to Asia-Pacific with Jardine Schindler joint venture

1980

Established first industrial joint venture of the People's Republic of China with a western company

We are focused on ensuring safety, quality, and customer satisfaction, coupled with unwavering integrity and trust. Built on a legacy spanning five generations, these values form the foundation of our organization.

Leveraging our long history, we stand ready to support customers throughout the entire life span of their vertical transportation systems, ensuring reliability and innovation for years to come.

2009

Introduced our transit management system, Schindler PORT

2024

Launched Schindler Designs, featuring refined interiors and a new digital experience

1990

Developed world's first hall call destination system, Miconic 10

1998

Began operations in Schindler India Pvt.

# Our future-proof solutions

From small residential buildings to soaring skyscrapers, Schindler elevators are digitally enabled to provide reliable, energy-efficient, and seamless vertical mobility. Our solutions play a pivotal role in enhancing the overall quality of life in urban settings.

## Residential 1000

Simple, reliable, compact. The Schindler 1000 is a practical passenger elevator that ensures effortless installation.

Max 1.0 m/s Max 1000 kg Max 12 m

## Residential 3000

Stylish, comfortable, essential. The Schindler 3000 is designed for function, simplicity, and style.

Max 1.75 m/s Max 1179 kg Max 70 m

## Commercial 5000

Striking, flexible, effective. The Schindler 5000 boasts bold interiors, versatile car sizes, and efficient performance options.

Max 2.5 m/s Max 1350 kg Max 80 m

## Premium Commercial 6000

Unique, powerful, dynamic. The Schindler 6000 provides a superior experience thanks to leading technologies, luxurious finishes, and higher capacities.

Max 3.0 m/s Max 1800 kg Max 150 m  
Max 2.5 m/s Max 2600 kg Max 100 m

## High-rise 7000

Soaring, versatile, trailblazing. The Schindler 7000 redefines mobility in prominent global projects.

Max 10 m/s Max 5000 kg Max 500 m

# Schindler 5000

## Stylish and functional

The Schindler 5000 offers a variety of design and dimensional combinations from a single product line, and can be tailored to suit any urban environment. Select from a full spectrum of styles, colours and options to find the best possible solution for your building.

The Schindler 5000 is part of the new modular platform product range. From basic to sophisticated requirements, the Schindler 5000 is suitable for low- to mid-rise applications in offices, residential apartments, hotels and educational buildings.

### Key figures

Capacity	630 - 1350 kg
Travel height	Up to 80 m
Stops	Max 32 stops
Speed	1.0m/s 1.5m/s 1.75m/s 2.0 m/s
Drive system	Machine-room-less, eco-friendly regenerative drive technology, frequency controlled
Group size	Up to 8 cars
Entrances	Single or Through entry car
Interior	3 interior design lines, fresh wall colours or a bare car option for your own local custom interior design

### Designed for comfort

Engineered to Swiss standards for 24/7 operation and smooth ride comfort.

### Architectural flexibility

The widest range of applications, plus maximum flexibility in car and shaft dimensions.

### Future ready

Elevators designed to interface with next-generation technologies.

### Multiple design options

Three design lines to complement your building interior.

# Designed for comfort – built to last

## Engineered to Swiss standards

Schindler 5000 is designed, engineered and rigorously tested to ensure smooth, quiet and economical operation throughout your elevator’s long life cycle, for every application, and in any environment.

### Latest technologies, greater comfort

Variable frequency drive systems deliver perfectly controlled power to traction machines and door drives, extending component lifetimes and increasing energy efficiency. Schindler Suspension Traction Media is light and long-lasting, enabling the use of smaller traction machines that reduce both energy consumption and noise and vibration levels in the car.

### State-of-the-art digital controller

Schindler’s scalable (universal) elevator controller offers more flexibility in number of openings, number of stops, and car group size. What’s more, Schindler’s innovative EPIC sensor data transfer system for the controller improves both reliability and maintainability for all Schindler controllers.

### High-quality – at every level

Contact-free sensors assure millimeter-precise leveling with the floor for safe, seamless movement of passengers and goods in and out of the elevator.

### Innovative drive technology

Schindler 5000 is equipped as standard with our innovative, regenerative drive technology. The system is designed to reduce travel energy by up to 30% compared to any conventional technology available.

### Excellent ecological performance

Improving energy efficiency is essential to reduce the environmental impact of elevators and the buildings they serve. Eco-friendly features, such as regenerative drive, LED lighting and stand-by mode while parked, are standard in all Schindler 5000 elevators, achieving the highest energy-efficiency rating class A according to ISO 25745-2.

## Elevator segments

### Tailored to Schindler 5000

#### We Elevate...

##### Ofces

Our elevators and escalators deliver passengers to their ofces safely, quietly, efciently and in comfort. Offering flexibility in design, car sizes and control options, our elevators and escalators run at maximum efficiency during peak trafc and reduce energy consumption off-peak.

#### We Elevate...

##### Residential

Developers and owners of residential properties can always count on Schindler for stylish in-building transport that is safe, durable, smooth to ride, and highly efcient. With lighting, fxtures and colours to match the building’s architecture, we assure premium mobility for owners, facility managers and residents alike.

#### We Elevate...

##### Hotels

With many years of experience supplying elevators and escalators to hotels worldwide, we deliver guests to their rooms quietly, efciently and comfortably. Using the latest technology, we bring a new aesthetic design, enhanced security, in-car entertainment and exceptional performance that’s matched to guests’ needs and hotel requirements.

# Architectural flexibility

## Less space, more capacity

The Schindler 5000 benefits from our machine room-less (MRL) traction systems and compact door drives to optimise shaft space, reducing construction costs and leaving space for tenants.

**01 Smaller motor and traction sheave**  
Schindler's Suspension Traction Media (STM) system guarantees a quieter, smoother ride and does not require any oil or lubricant. STM also saves shaft space because of the smaller motor and traction sheave – 70% smaller than traditional systems. For passengers that means a better ride, while building owners will appreciate the increased reliability and efficiency .

**02 More usable building space**  
Less space for components, more usable building space and more room for passengers. Schindler 5000's innovative platform ensures that a standard-sized shaft can carry a wider car with bigger load capacity.

**03 Built-in inspection and test panel**  
Schindler 5000's inspection and test panel is built directly into a standard door frame at the top landing. This solution simplifies elevator installation, provides easy access, and saves space.

# Future ready

## Schindler elevators designed for next-generation technologies

Benefit from our tools, solutions and latest innovations to support you through the entire product life cycle of your elevator. Our elevators are designed to use state-of-the-art technologies from planning to operation.

### Plan & Design online

With just a few clicks, you can plan just the right elevator for your building. Our online **Plan & Design tool** provides you with recommendations, comprehensive product specifications and detailed layout drawings. All of these are compatible with **Building Information Modeling** standards, and with our **Project Cloud** you can share your projects with us.

### Innovation in installation

Schindler's new **INEX (Installation Excellence)** system not only reduces construction preparation and resources for our customers, it also improves safety and efficiency on site.

### Smart operation – switching to digital

All our new elevators are fully enabled for **Schindler Ahead** – our IoT (Internet of Things) portfolio of services. With Schindler Ahead, we make sure that our customers can step confidently into the digital era.

#### – Maximise uptime with Ahead Remote Monitoring

With digital connectivity, issues can be detected and addressed well before service is affected. This helps facilities take timely action to minimise or even avoid downtime. Schindler Ahead maximises uptime thanks to instant, accurate insights.

#### – Real-time insights with Ahead ActionBoard

Schindler Ahead ActionBoard provides operational, performance and commercial information in real time, giving customers clear, instant oversight of their entire elevator and escalator portfolio.

### User experience on a next level

**Schindler Ahead MediaScreen** makes paper a communication tool of the past. This in-car media solution provides relevant information to the passengers in real-time. Share building updates, news, weather, ensuring that passengers always stay informed.

Developing Schindler Ahead's data-driven intelligence

## Schindler Plan & Design tool

### Design your elevator layout in minutes

Our easy-to-use online planning tool makes it simple to find the matching vertical transportation setup for your building. The Schindler Plan & Design tool helps you to prepare specifications in the early stages of your building's project life cycle.

With just a few clicks, we provide you with recommendations, a comprehensive product specification, and detailed layout drawings. Simply download the data straight into your project design in DWG or PDF formats.

The solution can be integrated with Building Information Modeling standards, and our Project Cloud makes it easy for you to share your projects with us.
