We Elevate

Schindler

We
Elevate

2 billion

people every day

About Schindler

Our elevators, escalators, and moving walks transport more than 2 billion people up and down buildings and across transit hubs every day. With our customers, we help organize cities: moving people and goods and connecting transportation systems.

Global presence

Approximately 70,000 employees in over 100 countries serve our customers from over 1,000 branch offices worldwide, run production sites in eight countries, and operate six R&D facilities around the world.

Responsibility

We recognise that the challenges of depleting resources, climate change, and a growing world population require innovative solutions. That is why we focus on reducing the energy required by our products, services, and operations; and making safety, accessibility, and respect for all a top priority.

Customer excellence

We're dedicated to customer satisfaction and product excellence, with a focus on delivering exceptional service throughout the life span of your equipment. This commitment helps us build lasting, trust-based relationships with our clients.

Revolutionizing the way we move since 1874

1874

Founded by Robert Schindler and Eduard Villiger in Lucerne, Switzerland

1892

Built first electric elevator with belt drive

1906

Established first international venture in Germany

1936

Installed the first escalator

1974

Expanded to Asia-Pacific with Jardine Schindler joint venture

1980

Established first industrial joint venture of the People's Republic of China with a western company

We are focused on ensuring safety, quality, and customer satisfaction, coupled with unwavering integrity and trust. Built on a legacy spanning five generations, these values form the foundation of our organization.

Leveraging our long history, we stand ready to support customers throughout the entire life span of their vertical transportation systems, ensuring reliability and innovation for years to come.

2009

Introduced our transit management system, Schindler PORT

2024

Launched Schindler Designs, featuring refined interiors and a new digital experience

1990

Developed world's first hall call destination system, Miconic 10

1998

Began operations in Schindler India Pvt.

Our future-proof solutions

From small residential buildings to soaring skyscrapers, Schindler elevators are digitally enabled to provide reliable, energy-efficient, and seamless vertical mobility. Our solutions play a pivotal role in enhancing the overall quality of life in urban settings.

Residential 1000

Simple, reliable, compact. The Schindler 1000 is a practical passenger elevator that ensures effortless installation.

Max 1.0 m/s Max 1000 kg Max 12 m

Residential 3000

Stylish, comfortable, essential. The Schindler 3000 is designed for function, simplicity, and style.

Max 1.75 m/s Max 1179 kg Max 70 m

Commercial 5000

Striking, flexible, effective. The Schindler 5000 boasts bold interiors, versatile car sizes, and efficient performance options.

Max 2.5 m/s Max 1350 kg Max 80 m

Premium commercial 6000

Unique, powerful, dynamic. The Schindler 6000 provides a superior experience thanks to leading technologies, luxurious finishes, and higher capacities.

Max 3.0 m/s Max 1800 kg Max 150 m
Max 2.5 m/s Max 2600 kg Max 100 m

High-rise 7000

Soaring, versatile, trailblazing. The Schindler 7000 redefines mobility in prominent global projects.

Max 10 m/s Max 5000 kg Max 500 m

Schindler 6000

Unique, stylish and efficient

The Schindler 6000 offers a variety of design and dimensional combinations from a single product line, and can be tailored to suit any urban environment. Select from a full spectrum of styles, colours and options to find the best possible solution for your building.

The Schindler 6000 is part of the new modular platform product range. From basic to sophisticated requirements, the Schindler 6000 is suitable for low- to high-rise applications in offices, residential apartments, hotels and educational buildings.

Key figures

| | |
|---------------|--|
| Capacity | 630 - 2600 kg |
| Travel height | Up to 150 m |
| Stops | Up to 50 stops |
| Speed | 1.0m/s 1.5m/s 1.75m/s 2.0m/s 2.5m/s 3.0m/s |
| Drive system | Machine-room-less, eco-friendly regenerative drive technology, frequency controlled |
| Group size | Up to 8 cars |
| Entrances | Single or Through entry car |
| Interior | 4 interior design lines, fresh wall colours or a bare car option for your own local custom interior design |

First-class ride experience

Superior experience and performance. The Schindler 6000 is built around Swiss precision-engineered components of the highest quality.

Future ready

Elevators designed today to interface with next-generation technologies.

Efficiency and ecology

Schindler 6000 is equipped as standard with regenerative drive technology to reduce travel energy use by up to 30% (compared to conventional technology).

Full design freedom

Maximum creativity to achieve the ambiance that best suits your building.

Designed for comfort – built to last

Engineered to Swiss standards

Schindler 6000 is designed, engineered and rigorously tested to ensure smooth, quiet and economical operation throughout your elevator’s long life cycle, for every application, and in any environment.

Latest technologies, greater comfort

Variable frequency drive systems deliver perfectly controlled power to traction machines and door drives, extending component lifetimes and increasing energy efficiency. Schindler Suspension Traction Media is light and long-lasting, enabling the use of smaller traction machines that reduce both energy consumption and noise and vibration levels in the car.

State-of-the-art digital controller

Schindler’s scalable (universal) elevator controller offers more flexibility in number of openings, number of stops, and car group size. What’s more, Schindler’s innovative EPIC sensor data transfer system for the controller improves both reliability and maintainability for all Schindler controllers.

High-quality – at every level

Contact-free sensors assure millimeter-precise leveling with the floor for safe, seamless movement of passengers and goods in and out of the elevator.

Innovative drive technology

Schindler 6000 is equipped as standard with our innovative, regenerative drive technology. The system is designed to reduce travel energy by up to 30% compared to any conventional technology available.

Excellent ecological performance

Improving energy efficiency is essential to reduce the environmental impact of elevators and the buildings they serve. Eco-friendly features, such as regenerative drive, LED lighting and stand-by mode while parked, are standard in all Schindler 6000 elevators, achieving the highest energy-efficiency rating class A according to ISO 25745-2.

Elevator segments

Tailored to Schindler 6000

We Elevate...

Ofces

Our elevators and escalators deliver passengers to their ofces safely, quietly, efciently and in comfort. Offering flexibility in design, car sizes and control options, our elevators and escalators run at maximum efficiency during peak trafc and reduce energy consumption off-peak.

We Elevate...

Residential

Developers and owners of residential properties can always count on Schindler for stylish in-building transport that is safe, durable, smooth to ride, and highly efcient. With lighting, fxtures and colours to match the building’s architecture, we assure premium mobility for owners, facility managers and residents alike.

We Elevate...

Hotels

With many years of experience supplying elevators and escalators to hotels worldwide, we deliver guests to their rooms quietly, efciently and comfortably. Using the latest technology, we bring a new aesthetic design, enhanced security, in-car entertainment and exceptional performance that’s matched to guests’ needs and hotel requirements.

We Elevate...

Healthcare

Specificaly designed for healthcare, retirement and spa facilities, our bed elevator is reliable, durable and attractive. It’s also spacious enough to hold both patients and equipment at the same time. We offer special control options for emergency services and cleaning staff.

Architectural flexibility

Less space, more capacity

The Schindler 6000 benefits from our machine room-less (MRL) traction systems and compact door drives to optimise shaft space, reducing construction costs and leaving space for tenants.

Machine-room-less design

All main drive, traction and control equipment sits in the shaft, leaving architects and designers free to use the extra space for more productive purposes. The Schindler 6000 allows a larger car to be fitted into a standard shaft space.

Modular system and door dimensions

The Schindler 6000 car width is available from 1100 mm to 2500 mm, car depth from 1400 mm to 2700 mm, and car height up to 3200 mm.

Doors can be sized and positioned with millimeter accuracy. Door width from 900 mm to 1800 mm. Door heights from 2000 mm to 3000 mm, with a choice of Telescopic (T2), two panel Centre-opening doors (C2) or four panel Centre-opening doors (C4). Both width and height are adjustable in 100mm increments. All are available in Single or Through entry car.

Architectural flexibility

Less space, more capacity

Smaller motor and traction sheave

Schindler's Suspension Traction Media (STM) system guarantees a quieter, smoother ride and does not require any oil or lubricant. STM also saves shaft space because of the smaller motor and traction sheave – 70% smaller than traditional systems. For passengers that means a better ride, while building owners will appreciate the increased reliability and efficiency.

More usable building space

Less space for components, more usable building space and more room for passengers. Schindler 6000's innovative platform ensures that a standard-sized shaft can carry a wider car with bigger load capacity.

Future ready

Schindler elevators designed for next-generation technologies

Benefit from our tools, solutions and latest innovations to support you through the entire product life cycle of your elevator. Our elevators are designed to use state-of-the-art technologies from planning to operation.

Plan & Design online

With just a few clicks, you can plan just the right elevator for your building. Our online **Plan & Design tool** provides you with recommendations, comprehensive product specifications and detailed layout drawings. All of these are compatible with **Building Information Modeling** standards, and with our **Project Cloud** you can share your projects with us.

Innovation in installation

Schindler's new **INEX (Installation Excellence)** system not only reduces construction preparation and resources for our customers, it also improves safety and efficiency on site.

Smart operation – switching to digital

All our new elevators are fully enabled for **Schindler Ahead** – our IoT (Internet of Things) portfolio of services. With Schindler Ahead, we make sure that our customers can step confidently into the digital era.

– Maximise uptime with Ahead Remote Monitoring

With digital connectivity, issues can be detected and addressed well before service is affected. This helps facilities take timely action to minimise or even avoid downtime. Schindler Ahead maximises uptime thanks to instant, accurate insights.

– Real-time insights with Ahead ActionBoard

Schindler Ahead ActionBoard provides operational, performance and commercial information in real time, giving customers clear, instant oversight of their entire elevator and escalator portfolio.

User experience on a next level

Schindler Ahead MediaScreen makes paper a communication tool of the past. This in-car media solution provides relevant information to the passengers in real-time. Share building updates, news, weather, ensuring that passengers always stay informed.

Developing Schindler Ahead's data-driven intelligence

Our specialists are constantly working on future-oriented technologies

Schindler Ahead DoorShow is our new advertisement and information solution for your elevator doors

Schindler Plan & Design tool

Design your elevator layout in minutes

Our easy-to-use online planning tool makes it simple to find the matching vertical transportation setup for your building. The Schindler Plan & Design tool helps you to prepare specifications in the early stages of your building's project life cycle.

With just a few clicks, we provide you with recommendations, a comprehensive product specification, and detailed layout drawings. Simply download the data straight into your project design in DWG or PDF formats.

The solution can be integrated with Building Information Modeling standards, and our Project Cloud makes it easy for you to share your projects with us.
