

Schindler Elevator Interiors

Schindler Elevator Interiors.

Distinctive Lift Cars for today's world.

Lift car remodeling is a great way to add value to any building. If you are a building owner or manager, Schindler can help design a lift car that will fit your style and budget. Choose from an almost limitless selection and combination of surface materials, lighting and hardware.

Wall Panels

Schindler can provide a wide range of wall panels to suit your building including painted glass, timber, laminates and a range of stainless steel finishes. Create the look and feel you like by combining colours and materials with mirrors and fixtures to achieve the ambiance that fits your building and budget.

Ceilings

The right ceiling can dramatically affect the appearance of a lift car interior. Schindler can provide a range of ceilings in many types of material with a selection of lighting variations to enhance the lift aesthetics whilst optimising energy consumption and maintenance costs.

Handrails

Handrails are through-bolted, making Schindler elevator handrails among the most secure in the industry. Full consideration is taken to ensure compliance with local disability requirements. Standard handrails have returned ends for added safety and durability, and set screws for access. Handrails are available in a range of materials including satin stainless steel, satin bronze, mirror stainless steel and timber.
