We Elevate...

Safety

From our dedicated safety days for all of our field-based staff, to our Ellie and Eski children's safety campaign and the training we provide to safe work regulators and emergency services, We Elevate Safety.

Our Confirmation of Periodic Safety Inspection (CPSI) program has set a new industry benchmark. Each year our certified technicians perform a safety inspection of over 60 points on your lift. A service which is replicated every two years for escalators under our care. Coupling this with your regular service visits means that your lifts and escalators and the people who use them are safe with Schindler.

At Schindler we are united by a shared promise, "an uncompromising commitment to safety, quality, the customer and each other." We are committed to doing it right the first time.

Industry Leading Safety Initiatives

- Every lift and escalator is extensively tested periodically by technicians who have undergone stringent training in Schindler's CPSI program.
- Our Ellie and Eski children's safety program is the most comprehensive of its type available and has been welcomed by our major clients as an effective tool to educate young passengers on the safe use of elevators and escalators.
- Each of our field-based staff undergo annual safety refresher training. Our resources and training facilities are also used by safe work regulators and emergency services to ensure that they are kept up to date with the latest vertical transport safety processes and procedures.

That's the Schindler difference.
